PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2+ years shipping production Next.js/React/TypeScript applications and Node.js backends. Founded and architected TestHub, a SaaS platform, end-to-end, and won two frontend hackathons under time pressure. Focused on clean component architecture, measurable performance gains, and secure API/database design.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: Next.js, React.js, Redux, Tailwind CSS, Responsive/Accessible UI

Backend: Node.js, Express.js, RESTful API design, Authentication & Authorization

Databases: PostgreSQL, MongoDB, Relational Schema Design, Query Optimization

Tools: Git, GitHub, CI basics, WordPress, Software Architecture & Design Patterns

PROFESSIONAL EXPERIENCE

Associate Software Engineer (*Geeks of Kolachi, Karachi* Jun 2024 – Present)

- Architected and shipped 10+ responsive, pixel-perfect Next.js/React/TypeScript interfaces for production client products, cutting UI-to-integration handoff time by adopting a reusable component library.
- Refactored state management and rendering logic, reducing average page load time and eliminating recurring cross-browser rendering bugs.
- Partnered with backend engineers to design and integrate RESTful APIs against PostgreSQL/MongoDB, supporting concurrent users with no data-integrity incidents.

Full-Stack Web Developer (Self-Employed) (*Freelance, Remote* May 2022 – Present)

- Delivered end-to-end web projects for local and international clients, owning requirements gathering, architecture, development, and deployment independently.
- Built and launched custom Next.js/React applications and WordPress sites, including theme customization and plugin configuration, achieving 95% average client satisfaction / repeat-business rate.
- Designed relational and NoSQL data models (PostgreSQL, MongoDB) and secure API integrations, reducing data-related bugs reported post-launch.

Web & Mobile Application Development Intern (*Saylani Mass IT Training SMIT, Karachi* Feb 2023 – Oct 2024)

- Completed an intensive full-stack training program, hybrid web and mobile projects using JavaScript and React.js under senior engineer mentorship.

FLAGSHIP PROJECT

TestHub — Founder & Lead Architect (testhubbeta.netlify.app)

Stack: Next.js, React.js, Node.js, TypeScript, PostgreSQL, Tailwind CSS

- Founded and architected a live SaaS community platform connecting [X]+ software testers to share testing methodologies, replacing scattered forum/Slack workflows with a single collaborative hub.
- Recognized as Winner – Best FYP Idea at Zab-E-Fest 2026 for technical architecture, scalability, and market potential.

EDUCATION

BS Computer Science — CGPA 3.66/4.0 (*SZABIST, Karachi* 2022 – 2026)

- Core focus: Software Engineering, Database Systems, Web Application Architecture.
- Capstone (TestHub): Conceived and architected a global platform for software testers to collaborate and share testing methodologies.

HONORS & AWARDS

- Winner — Best FYP Idea (TestHub), Zab-E-Fest 2026 — 1st place for technical architecture, scalability, and market potential.
- Winner — UI Development Competition, Zab-E-Fest 2026 — 1st place, responsive/accessible frontend hackathon.
- Runner-Up — UI Development Competition, Zab-E-Fest 2025 — 2nd place for frontend development

CERTIFICATIONS

- Version Control — Meta (Nov 2023, ID: QJQWYF22EWKN) | Programming with JavaScript — Meta
